*Allowable Subject Matter*

1. Claims 60,61,63-72,74-81, now renumbered as 1-20 are allowed based on Applicant's arguments received on 10/01/07. Also, none of the references, either singularly or in combination, teaches or even suggests: a method of operating a gaming machine whereby triggering one or more of the colored LEDs provides color change of the candle, without requiring the use or removal or insertion of a colored plastic insert within the candle for changing the color that is displayed.

The closest prior arts, Hoorn teaches a gaming machine (4:48-49), a user input mechanism (4:49-50), an external visual indicator providing illumination in multiple colors (5:1-13), the colors are illuminated in a controlled fashion as a result of different events (5:1-13) such as jackpots(Abstract) and requirements for service (5:8-12), the external visual indicator is a cylindrically shaped electronic candle (Fig. 3), the customized illumination pattern is a two-stage candle with different light sources (5:41-43). A processor controlling game input and illumination output is inherent with gaming machines and is supported through the disclosure of the gaming machine maybe any variety of computer (3:60-63). However, Hoorn does not teach the above limitations.

Any inquiry concerning this communication should be directed to RONALD LANEAU at telephone number (571)272-6784.
